## About

Paper.js — The Swiss Army Knife of Vector Graphics Scripting.

Paper.js is an open source vector graphics scripting framework that runs on top of the HTML5 Canvas. It offers a clean Scene Graph / Document Object Model and a lot of powerful functionality to create and work with vector graphics and bezier curves, all neatly wrapped up in a well designed, consistent and clean programming interface.

Paper.js is based on and largely compatible with Scriptographer, a scripting environment for Adobe Illustrator with an active community of scripters and more than 10 years of development.

Paper.js is easy to learn for beginners and has lots to master for intermediate and advanced users.

Paper.js is developed by Jürg Lehni & Jonathan Puckey, and distributed under the permissive MIT License.

## Getting Started

- First of all, take a look at some of our examples.
- Download Paper.js or check out the latest version from our Github Repository.
- Want to learn Paper.js? Why not start now with one of our Tutorials.
- If you have any questions or comments, please join the mailing list.
- To stay up to date, follow us on Twitter.

## Overview

Paper.js is not simply a wrapper around the Canvas, it offers much more:

- A Scene Graph / Document Object Model for vector graphics: Work with nested layers, groups, paths, compound paths, rasters, symbols etc.
- The handling and drawing of these graphic items is automatic and
